Learning objective	Self-check
Diagnose pipeline weaknesses	■ Confident ■ Practising ■ Review
Use KPI data for coaching decisions	■ Confident ■ Practising ■ Review
Build a realistic 30-day improvement plan	■ Confident ■ Practising ■ Review

Lesson Guide

In-depth notes for Pipeline diagnosis and coaching review - study, annotate, and revisit before client meetings.

What top agents review

A pipeline review looks at leads generated, qualified enquiries, listings won, viewings booked, offers received, deals closed, response times, and follow-up gaps. The numbers show which skill needs attention.

Diagnosis examples

Many leads but few viewings may mean qualification or listing quality is weak. Many viewings but few offers may point to pricing, property fit, or follow-up. Many offers but few closures may reveal negotiation or document delays.

Coaching output

Submit one monthly dashboard with a written diagnosis and a 30-day improvement plan. Include one habit to stop, one habit to improve, and one metric to watch weekly.

Apply in the Field

■	Practise: Diagnose pipeline weaknesses
■	Practise: Use KPI data for coaching decisions
■	Practise: Build a realistic 30-day improvement plan

Reflection Questions

1. How will you apply “Diagnose pipeline weaknesses” in your next client conversation or property visit?
