Lesson Guide

In-depth notes for Comparative Market Analysis pricing workshop - study, annotate, and revisit before client meetings.

Why pricing skill matters

Overpricing wins temporary approval but loses time, trust, and buyer attention. Underpricing creates disputes and reputational damage. A top agent explains price with evidence and helps the client choose a strategy, not a guess.

CMA method

Collect at least three comparable properties, adjust for location, land size, improvements, condition, urgency, and features, then write a price range with reasons. Separate facts from assumptions and note where data is weak.

Workshop output

Complete a Property Appraisal Form for a real or practice property. Include comparables, recommended range, listing strategy, likely objections, and the conversation you would have if the owner insists on a higher price.
